WEIGHT AND BALANCE
MASTERMIND HANDHELD

- ▶ GET WEIGHING RESULTS IN SECONDS
- ▶ REMOTE WIRELESS TECHNOLOGY
- ▶ SAFER WEIGHT & BALANCE SOLUTION
- ▶ WORKS WITH GEC AIRCRAFT AND TRUCK SCALES

WEIGHT AND BALANCE MASTERMIND HANDHELD

REMOTE HANDHELD UNIT WITH WIRELESS TECHNOLOGY

The GEC CG Mastermind® is a handheld computer that communicates wirelessly to the GEC line of platform aircraft scales, or wireless Top of Jack Brainweigh2004 Load Cell System, as well as the GEC MD700/1100/1200 heavy duty truck axle scales.

The CG Mastermind is pre-programmed with up to 300 aircraft configurations and instantaneously displays individual load cells, reaction points, total Gross Weight, along with Center of Gravity(CG), and percent of Mean Aerodynamic Chord (MAC) calculations. Using MS Windows® OE operating system, the entire weighing record can be saved, transferred via cable, and even transmitted via e-mail directly from the weighing location.

The GEC CG Mastermind can be used in conjunction with the innovative Brainweigh 2004 aircraft wireless load cell weighing system, the ULP 410, LPA 400 or AN60-6 aircraft scales weighing systems that provide dependable, accurate weight and balance solutions to the aviation community. The CG Mastermind also works with the GEC MD700/1100/1200 semi-portable axle scales that are designed to handle virtually any heavy truck weighing job almost anywhere.

► GEC: Bringing Innovation To World

For nearly 54 years, GEC has led the industry in the design, manufacture and marketing of weighing equipment. Moreover, GEC continues to improve equipment so that it is more efficient and less costly. The Mastermind brings it to a new height of efficiency. The GEC Mastermind wireless handheld brings weighing processes together with the various portable scales that are designed and built for simplicity, ruggedness, and reliability, even in extreme conditions.
