## ▶ LPA 400

The LPA400 is your sure bet in low-profile, reliable portable aircraft weighing systems!

### LOW PROFILE

Just over an inches high, no ramps are needed.

### LIGHTWEIGHT

The LPA400 is easy to move from one aircraft and one location to another. Each platform weighs only 30 pounds so you can carry them in a car trunk.

### LARGE CAPACITY

The platforms have a capacity of up to 45,000 pounds each.

### ACCURACY

These GEC weighing systems are remarkable accurate - up to  $\pm 0.1\%$  of the applied load (or 5 pounds) with repeatability.

### INSTRUMENT

An extremely accurate and stable indicator that can interface with a laptop computer.

### NO RAMPS

At just a little over 1 inch high, the LPA400 does not require ramps and bridges and sets up very quickly in almost any location.

Wireless Capable

### ▶ GEC: Bringing Innovation To World Aviation

The LPA400 is your sure bet in reliable portable aircraft weighing systems! For nearly 54 years, GEC has supplied the industry with dependable weight and balance equipment worldwide. Moreover, GEC continues to improve equipment so that it is more efficient and less costly.
