SIZES AND CAPACITIES

Whether you choose the MD700, MD1100, or MD1200, you are choosing high-performance scales designed to withstand the rigors of routine and regulatory weighing. All the MD series scales make use of a unique load cell design and are made of only the highest quality materials resulting in consistent high accuracy, repeatability, and longevity not found in similar scale systems. With a capacity up to 120,000 (split axle), GEC's transportable, semi-portable axle scales can handle virtually any heavy truck weighing job almost anywhere.

SOLID ALUMINUM WEIGHT BRIDGES

The bridges can take high volume weighing without fatigue or failure. They are made of solid, high-strength 6061-T-6 aluminum - eliminating down-time caused by welded steel bridge failures.

PATENTED LOAD CELL DESIGN

GEC uses this load cell design to obtain the highest accuracy. Hermetically sealed, these load cells are moisture proof and provide pinpoint accuracy throughout a wide temperature range. Self-leveling by design, the load cells counteract the effects of side loads due to surface irregularities.

Wireless Capable

▶ GEC

For nearly 54 years, GEC has led the industry in the design, manufacture and marketing of truck weighing equipment. Moreover, When it comes to heavy duty axle scales design, GEC has the know-how. Whether you choose the MD 700, MD1100, or MD1200, you are choosing high-performance scales designed to withstand the rigors of routine and regulatory weighing.

EASY SETUP

GEC semi-portables are proven as the most reliable and trouble free axle scales available. Easy Setup is assured with GEC axle scales. They are shipped fully assembled, and ready to use.

TRANSPORT TRAILER

One person can install the axle scale system quickly using the tilt-bed transport trailer. Equipped with storage/tool box and an electric winch, the trailer makes unloading and loading the scales easy and safe.

WEIGHT INDICATOR

This NTEP-approved instrument communicates on up to 4 channels. It has an accumulative feature and can be configured for either split axle weighing or 200 truck in/out modes. The WI300 is self contained in a carry case and can be equipped with either an internal or external printer to print custom formatted weighing ticket forms.
